

The MEIA provides awareness and skills based training to environmental industries in the Province with a focus on waste management, water issues and renewable energy .

We do this through direct training, awareness sessions, networking, partnerships and consultations.

Manitoba Environmental Industries Association

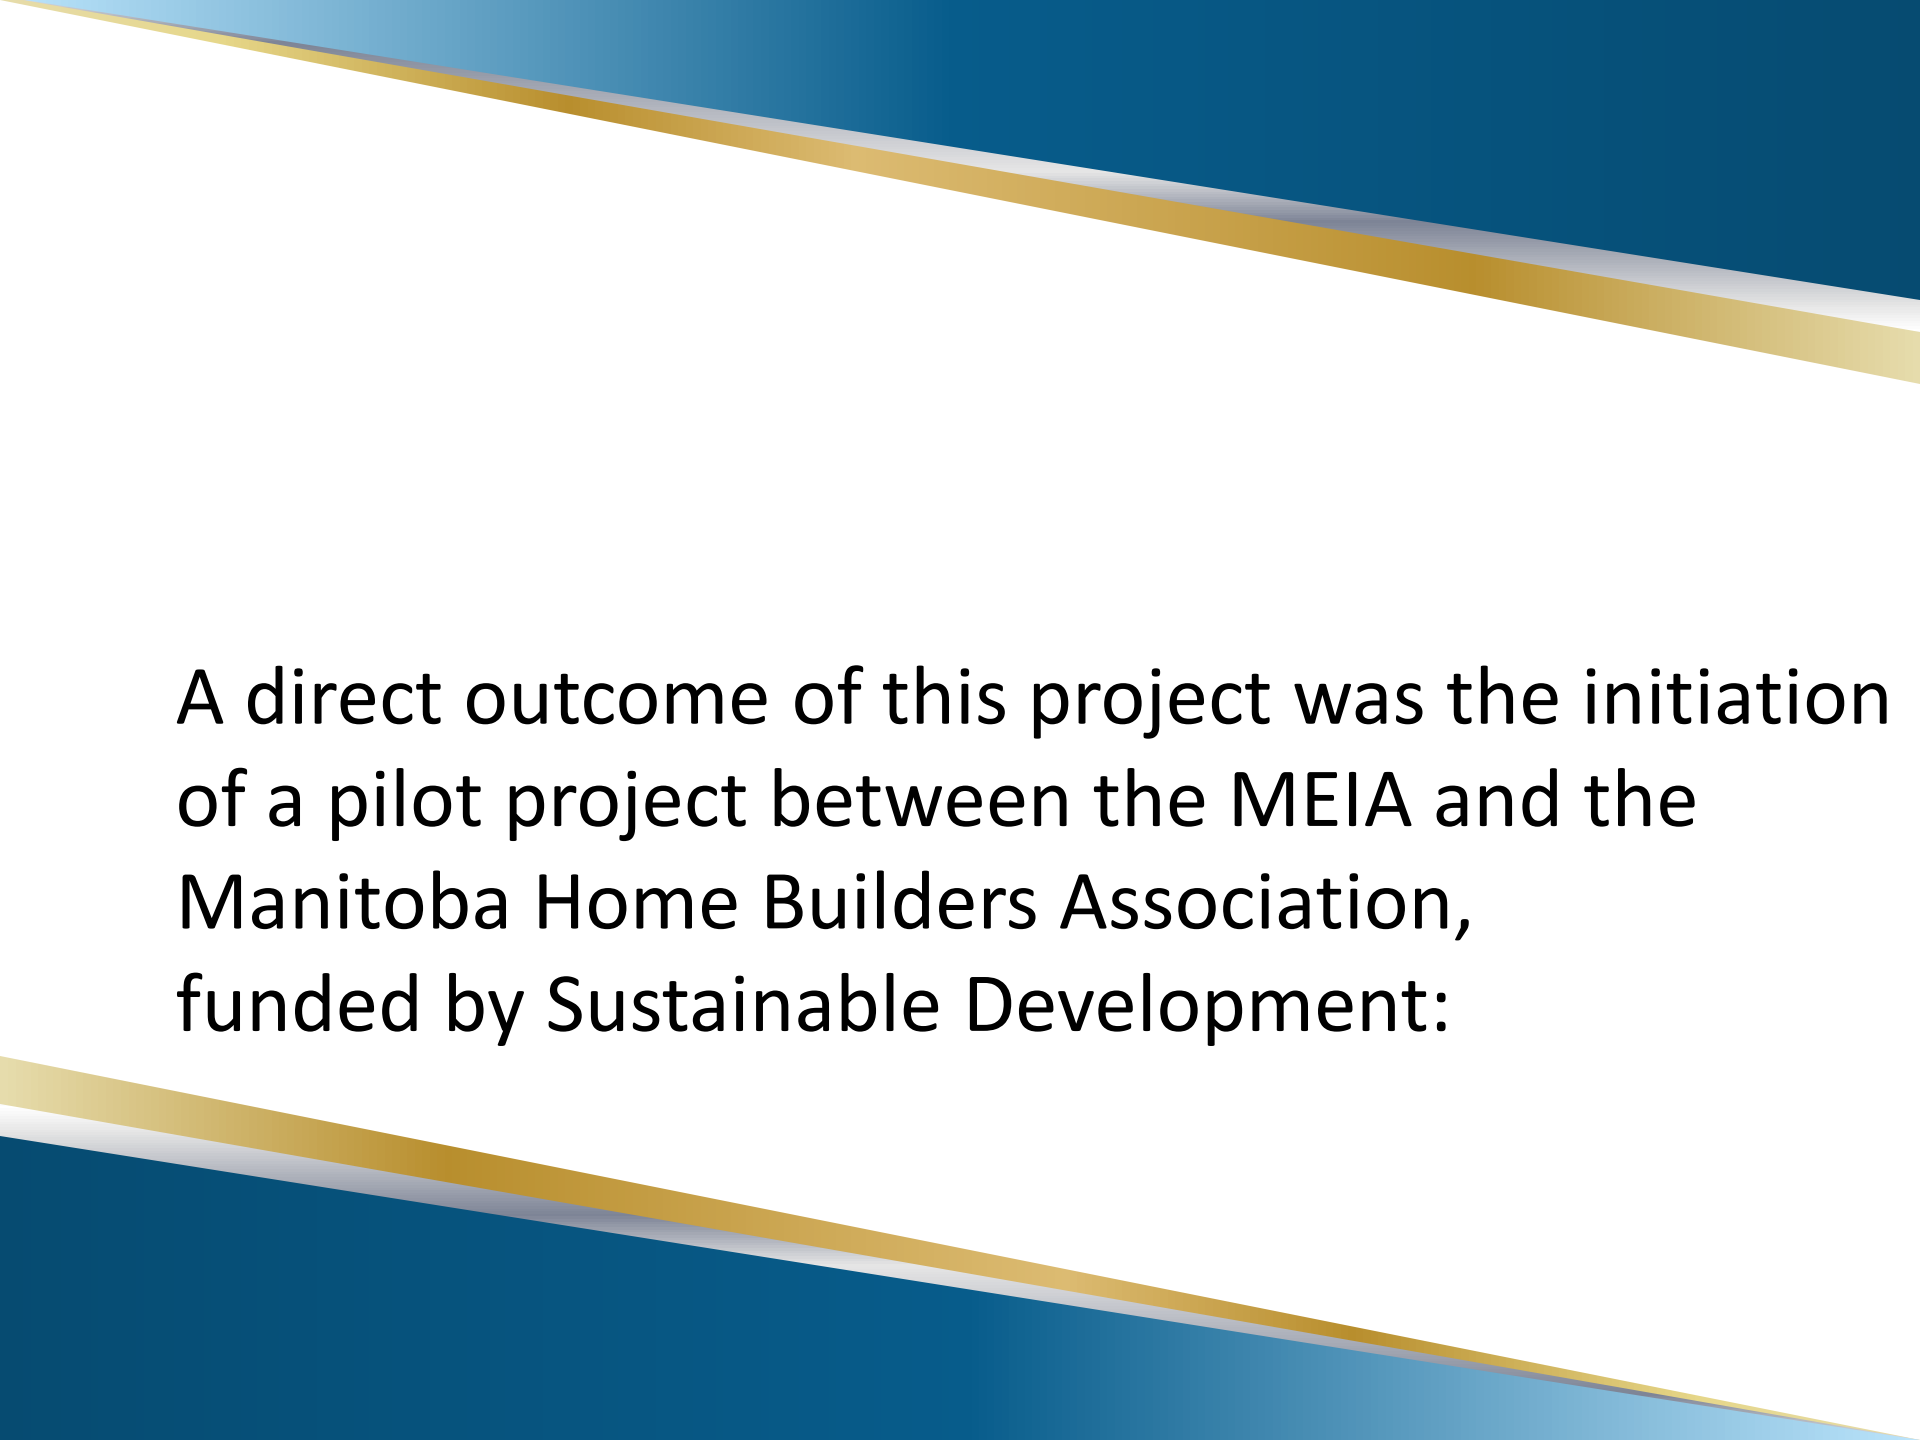

&

Green Manitoba

Green Manitoba funded the MEIA

To engage the construction industry, institutions and other stakeholders by increasing education and awareness of waste diversion opportunities in construction, renovation and demolition (CR&D) & industrial, commercial and institutional sectors.

A direct outcome of this project was the initiation of a pilot project between the MEIA and the Manitoba Home Builders Association, funded by Sustainable Development:

New Home Construction Waste Diversion Study

**So we did what smart folks do and
hired Mike Fernandes of
StrategyMakers Consulting
to manage the project!**
